Configurator

2024/06/26 - rel. 1.4.0.0

Enhancements

- Added a "long press" propriety for the switch object.
- Added possibility to choose the supported mode on HVAC objects.
- Added the option to disable "OFF" for the fan on the Thermo Comfort object and to name the fan speeds.
- Added limits to access control properties: code length, code number, confirmation time, number of attempts, and attempt interval.
- Added Favorite Function.
- Improved connection.
- Added the option to keep the lock screen always on when the app is running (iOS).
- New legend for charts and interactive features.
- Improved charts layout in portrait mode.

Fixes

- Fixed bug on PBX group calling
- Fixed movement of a group with another graphical object giving wrong pixel movement
- Fixed some bugs on Undo and Redo
- Fixed some bugs on arrange object in the TreeView
- Fixed Replace KNX group

Application

ThinKnx UP client

2023/07/05 - rel. 1.2.34 (All platforms)

Enhancements

- Added possibility to choose the supported mode on HVAC objects.
- Added the option to disable "OFF" for the fan on the Thermo Comfort object and to name the fan speeds.
- Added Favorite Function.
- Improved connection.
- Added the option to keep the lock screen always on when the app is running (iOS).
- New legend for charts and interactive features.
- Improved charts layout in portrait mode.
